

## **2019 ARC Conference Breakout Sessions**

### **Out of the Box – Maybe ... Part of our Future – Certainly?**

This session may be under the radar at a quick glance, but you may want to lock this one in as we focus on light, sound and energy issues that are affecting millions of Americans greatly every day.

### **A New Green Waste? (Medical Marijuana in AR)**

Medical Marijuana approved for Arkansas check! But are we ready for the disposal issues that may come with it. This session will focus on green waste and packaging within the medical marijuana industry within Arkansas.

### **The Future of Battery Disposal Management**

Just think about it, literally everything we touch now has a battery. So how do we dispose of everything? This session will guide you along the curvy road that is battery recycling.

### **Sustainable Brands in AR**

In this session we will spotlight some of Arkansas' best sustainable brands. Large to small we have you covered on how these Arkansas companies stay in the forefront of sustainability.

### **Measuring Success**

You can measure your program in many ways. To look good or simply put because you are required to report. This session will take a look at how reporting your recycling rates correctly can actually improve your program and help you plan to improve your recycling rates.

### **The Future of Packaging (Plastic, mixed paper, etc.)**

Packaging, something most consumers never consider. This session will dive into the very technological world of packaging and how little changes can affect our recycling rates versus landfill rates as well as consumer ease of use.

### **Taking Recycling Education to the Next Level**

In our current recycling market, every decision is critical. This session will focus on taking your current program to the next level even when the odds are stacked against you.

### **State of Recycling in AR and the US**

Talk about a can't miss session! As we all know recycling is difficult and prices are complicated at best. This session will focus on the state of recycling in Arkansas as well as the US. We just may end up with some sort of direction after this panel tackles this very difficult topic.
